DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 12 is rejected under 35 U.S.C. 102(b) as being anticipated by Sawa (U.S. Patent 5228190).

Sawa discloses: a method of manufacturing a vehicle body compartment lid, the method comprising: providing a one-piece panel having a first portion formed as a vehicle body compartment lid **outer panel** (Wo) and a second portion formed as a vehicle body compartment lid **inner panel** (Wi) (col. 1, lines 7 and 8; col.3, lines 41-50)); and subsequent to the providing a one-piece panel, bending the panel to form a crease between the first portion and the second portion (col.3, lines 41-50; Fig. 1).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 13-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sawa in view of Kurosawa et al. (U.S. Patent 4748837)).

Sawa teach the limitation except subjecting a metal sheet to fluid pressure to form the

Art Unit: 3726

one-piece panel.

Kurosawa et al. teach the step of subjecting a metal sheet to fluid pressure to form the unitary panel (Abstract; Claim 1).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to employ the step of subjecting a metal sheet to fluid pressure to form the unitary panel as taught by Kurosawa et al. on the method of Sawa so as to achieve a high degree of accuracy.

Allowable Subject Matter

5. Claims 16-20 are allowed.

Response to Arguments

6. Applicant's arguments filed 7/14/06 have been fully considered but they are not persuasive. See the new Office action.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. Art Unit: 3726
